

## Glass to Metal Adaptors

Larson Electronic Glass offers 1/8" to 6" OD tubular seals sealed to various metals including: Kovar®, 304 stainless steel, OFHC Copper, and directly to 321 stainless steel bellows. Glass to metal adaptors are used primarily to make an UHV connection directly to glass components and accessories, or adapt a metal chamber to glass ancillary components. They are offered in many connection configurations with or without flanges, CF type flanges for use below  $1 \times 10^{-11}$  Torr, and in ISO type o-ring seal flanges for use in intermediate vacuum ranges. Virtually all standard adapters are available in modified form to meet your special requirements.

### Features:
